

LOKESH ADDANKI

Full Stack Developer

+1 317(794)1595 | codeknight.adloky@gmail.com

SUMMARY

Full Stack Developer with around 5 years of experience in finance, insurance, and automotive domains, delivering cloud native microservices and responsive Angular front ends. Migrated legacy monoliths to containerized Node.js and Spring Boot services on Azure Kubernetes and GKE, reducing incident resolution time and boosting system reliability. Guided cross functional teams through CI/CD pipelines using GitHub Actions and Jenkins, accelerating release cadence while mentoring engineers.

EXPERIENCE

Full Stack Developer | Citigroup | Chicago, USA | May 2024—Present

- Designed and developed scalable full stack applications using Angular, Node.js, and REST APIs, with a strong focus on security and performance, and deployed them on Azure K8s using GitHub Actions for continuous integration and deployment.
- Architected and developed scalable microservices using Node.js, GraphQL, and MongoDB, with a focus on event driven architecture and continuous deployment using Azure K8s and GitHub Actions, resulting in a 30% increase in system uptime and a 25% reduction in latency.
- Extensive cloud and container experience deploying services on AWS, GCP, PCF, OpenShift, and GKE using Docker, Kubernetes, Helm, Terraform, and Serverless Framework.
- Strong DevOps and CI/CD expertise with Jenkins, GitHub Actions, GitLab, Cloud Build, Nexus, Git, SVN, and Docker automation, improving delivery efficiency and deployment reliability.
- Database and data engineering experience with PostgreSQL, MongoDB, DB2, Oracle, JDBC, Spring Data, replication, backups, performance tuning, and Spark (Scala, Spark SQL) pipelines.
- Worked with observability and monitoring tools (CloudWatch, ELK stack) to track system health, create dashboards, and perform root cause analysis in distributed systems.
- Event streaming and real time data processing using Kafka, AWS Lambda, Kinesis, Pub/Sub, SNS, SQS, HDFS, and BigQuery for analytics and operational workloads.
- Designed and developed scalable backend services using Node.js and Express, exposing REST APIs and integrating with Kafka based event streams.
- Developed and optimized BigQuery based data pipelines for analytics workloads. Improved system reliability and uptime by implementing health checks, retries, and fault tolerant design patterns.
- Test automation and quality engineering using Playwright, Karate, Cucumber (BDD), Jest, React Native Testing Library, and Agile practices (Scrum, TDD, BDD).
- Performance optimization and troubleshooting expertise using JVM profiling, multithreading, Executor Service, log analysis, CloudWatch monitoring, and root cause analysis.
- Implemented authentication, validation, and rate limiting using API Gateway and OAuth2.
- Built API first microservices with Node.js and Python supporting state transitions and business rule processing.
- Security and compliance experience implementing OAuth 2.0, RBAC, IAM, Google Secret Manager, secure API design, XML/JSON validation, and enterprise security standards.
- Leadership and SDLC ownership, including design reviews, mentoring engineers, cross team collaboration, incident response, and end to end delivery of highly available enterprise systems.
- Developed and optimized MongoDB databases for high performance data storage and retrieval, and integrated them with Node.js and GraphQL APIs for real time data processing and analytics.
- Implemented Akamai setup for content delivery and caching, resulting in a 40% reduction in page load times and a 20% increase in user engagement, and integrated it with Azure K8s for seamless deployment and management.

Full Stack Developer | Arthur J. Gallagher & Co | Illinois, USA | Nov 2023—Apr 2024

- Developed and deployed scalable full stack applications using Angular, Node.js, and REST APIs, with a strong focus on security and performance, and integrated them with MongoDB databases for high performance data storage and retrieval.
- Designed and developed microservices and REST APIs using Spring Boot, Spring MVC, Node.js, Spring AOP, Actuator, and Axis2, deployed on AWS, GCP Cloud Run, PCF, and Kubernetes.
- Implemented event driven and distributed systems using Apache Kafka, Kinesis, JMS, and SOA (SOAP, WSDL, JAX WS) to support real time and high volume data processing.
- Strong cloud, container, and DevOps expertise with Docker, Kubernetes, Terraform, Jenkins, GitHub, AWS Lambda, ECS, AMIs, and automated CI/CD pipelines.
- Experience with observability concepts and tools; familiar with Dynatrace and similar monitoring platforms. Performed functional and integration testing, identified defects, and collaborated with teams to resolve issues.
- Implemented asynchronous messaging systems for resilient application workflows. Built cloud native microservices architectures, ensuring high availability and scalability.
- Data engineering and analytics experience using Spark (Scala), Hadoop, HDFS, Hive, BigQuery, Cloud SQL, Cassandra, PostgreSQL, MongoDB, and Oracle with performance optimization.
- Applied Agile, Scrum, and TDD practices, implementing unit and integration testing using JUnit, Mockito, and participating in post incident reviews and system observability improvements.
- Implemented monitoring and logging solutions for distributed systems. Optimized system performance and reliability through distributed tracing and log analysis.
- Performed functional and integration testing, identified defects, and collaborated with teams to resolve issues.
- Performance tuning and scalability optimization using multithreading, synchronization, Spark job tuning, and distributed database optimization, achieving up to 25% performance gains.

- Technical leadership and collaboration, leading architecture reviews, mentoring junior engineers, and partnering with product, DevOps, and operations teams to deliver reliable enterprise platforms.
- Designed and implemented Linux/Unix shell scripts for automated deployment and management of Azure K8s clusters, resulting in a 50% reduction in deployment time and a 30% increase in system reliability.

Java Full Stack Developer | Toyota Kirloskar Motor | Bengaluru, India | Dec 2021—Jun 2023

- Developed and secured REST APIs using Node.js, GraphQL, and JSON/WebToken, and integrated them with Azure K8s and GitHub Actions for continuous deployment and security, resulting in a 40% increase in API security and a 25% reduction in latency.
- Built and modernized applications using Struts (MVC), Spring Framework (IOC, JDBC, ORM, AOP), JAX WS, JSP, and refactored monoliths into Spring Boot microservices.
- Developed cloud native Node.js services using AWS API Gateway, Lambda, EC2, S3, DynamoDB, and load balanced API deployments.
- Built REST APIs using Flask/Django to support backend workflows and automation pipelines. Designed and deployed microservices on GCP using GKE and Cloud Run.
- Strong front end expertise with AngularJS/Angular 11+, React.js, HTML5, CSS3, jQuery, JSF, and MEAN stack, delivering responsive and high performance UIs.
- Implemented CI/CD and cloud automation using Gradle, Jenkins, CloudFormation (JSON), Docker, and AWS deployments with monitoring and lifecycle management.
- Implemented event driven architecture using GCP Pub/Sub for real time data processing. Enabled observability using ELK Stack and CloudWatch, reducing incident resolution time.
- Delivered backend services in regulated enterprise environments with a strong focus on security, auditability, and data privacy.
- Built message driven and asynchronous systems using JMS, Message Driven Beans, and microservices based workflows.
- Enhanced application performance and reliability through debugging, monitoring, test automation, and AI assisted code quality improvements.
- Developed Python based microservices for data processing, rules execution, and ML service integration.
- Collaborated across Agile teams, documenting architecture and APIs, leading code reviews, and working closely with UI/UX and backend teams.
- Implemented continuous integration and deployment pipelines using GitHub Actions, resulting in a 50% reduction in deployment time and a 30% increase in system reliability, and integrated them with Azure K8s for seamless deployment and management.

Software Developer | Merck Group | Bengaluru, India | Dec 2020—Nov 2021

- Integrated automated testing into CI/CD pipelines to improve code quality and catch issues early.
- Developed responsive front end UIs using React.js, AngularJS, JavaScript, HTML5, CSS3, jQuery, AJAX, and dynamic widgets with cross browser compatibility.
- Built RESTful microservices and APIs using Spring Boot, Jersey, JAX RS, Apache CXF, Hibernate, and JPA for healthcare analytics systems.
- Implemented API management using AWS API Gateway with request validation, throttling, and secure OAuth2 based access control.
- Implemented asynchronous messaging using Kafka producer consumer flows for distributed service communication.
- Established CI/CD pipelines using Git, Jenkins, Maven, Gradle, Nexus, Docker, and AWS deployments.
- Improved system reliability using health checks, retries, circuit breakers, and observability with CloudWatch, ELK, and distributed tracing.
- Automated infrastructure provisioning with AWS CloudFormation and Terraform for consistent multi environment deployments. Built REST APIs using Flask/Django to support backend workflows and automation pipelines.
- Implemented monitoring and observability using AWS CloudWatch dashboards and health checks for distributed systems.
- Developed automation scripts using Shell and Python for validation, log monitoring, and deployment tasks.
- Collaborated in Agile teams, guiding responsive UI design, REST architecture, and performance focused enhancements.

SKILLS

Programming Languages & Core Backend: Java, Java 8+, J2EE, Python, Django, Flask, Node.js, Express.js, Kotlin, Scala, C, C++, Spring Boot, Spring Framework, Spring MVC, Spring Batch, Spring Core, Spring JDBC, Spring JPA, Spring Security, Hibernate, Drools, Ruby on Rails, Jersey, JAX RS, Apache CXF

Frontend & UI Development: React, React Native, React Testing Library, Angular, AngularJS, Angular 11+, Vue.js, Nuxt, PrimeVue, HTML5, CSS3, JavaScript, jQuery, AJAX, Bootstrap, Tailwind, Material UI, Responsive Design, Cross Browser Compatibility, Babel, JSF, Angular/CSS

Cloud Platforms & DevOps: AWS Lambda, AWS EC2, AWS S3, AWS API Gateway, AWS CloudWatch, AWS Kinesis, AWS SQS, AWS ECS, AWS AMIs, AWS CloudFormation, AWS Amplify, GCP GKE, GCP Cloud Run, GCP Pub/Sub, GCP BigQuery, GCP Cloud Build, GCP Cloud SQL, Azure, Azure AD, Pivotal Cloud Foundry (PCF), OpenShift, Docker, Kubernetes, Helm, Terraform, Ansible, Serverless Framework, CI/CD, Jenkins, GitHub Actions, GitLab, Maven, Gradle, Nexus, Webpack, ArgoCD, Git, GitHub, Bitbucket, SVN, Azure K8s, K8s configurations

Databases & Data Engineering: SQL, PostgreSQL, MySQL, Oracle, DB2, Cloud SQL, MongoDB, DynamoDB, Cassandra, Hadoop, HDFS, Spark, Spark SQL, Hive, Kafka, Kinesis, Pub/Sub, SNS, JMS, JDBC, Spring Data, JPA

System Architecture & Observability: Microservices, Distributed Systems, Event Driven Architecture, SOA, API Design, REST APIs, SOAP APIs, GraphQL, CQRS, DDD, ELK Stack, Dynatrace, Observability, Monitoring, Logging, Distributed Tracing, Performance Optimization, JVM Profiling, Multithreading, Executor Service, Log Analysis, System Reliability, High Availability, Scalability, Fault Tolerance, Struts, Axis2, WSDL, JAX WS, API Gateway, REST/SOAP, JSON, XML

Security & Quality Assurance: OAuth2, IAM, RBAC, Secret Manager, Google Secret Manager, Cloud Security, Secure API Design, Compliance Frameworks, Playwright, Karate, Cucumber (BDD), Jest, Cypress, JUnit, Mockito, Agile, Scrum, TDD, BDD,

Code Quality, Code Reviews, Jira, Confluence, Windows, Linux, Mac, UNIX, Shell Scripting, Python Scripting, Linux/Unix shell Scripting

EDUCATION

Master's, Computer Science | Lamar University | Beaumont, TX | Aug 2023—May 2025

CERTIFICATIONS

- AWS Certified Developer – Associate
 - Oracle Certifications: Java Focused
-
